DC360 Intumescent Coating

Description
DC360 is a water based intumescent coating used to increase fire resistance ratings and reduce the flammability and smoke development of construction materials like OSB/Plywood, gypsum and lumber.

DC360 complies with IBC/IRC Building Codes and provides a Class "A" Interior Finish rating in accordance with ASTM E84.

DC360 has also been tested to provide a 30 minute rating to various combustible substrates in accordance with ASTM E84 (30 Minute), ASTM E2768 and meets the criteria of NFPA 703 Standard for Fire Retardant Impregnated Wood and Fire Retardant Coatings for Building Materials.

DC360 can be used to increase the fire resistance ratings of certain assemblies common in the built environment such as gypsum wall and floor assemblies.

Applied as a coating to interior surfaces, DC360 can be top-coated with desired finish latex paint to match décor.
